Experience

Inflecto technologies

July 2023 – Current

Migration Consultant

Hyderabad, Telangana

- Design, develop, and maintain end-to-end ETL/ELT data pipelines using Informatica IDMC/IICS (CDI, CAI) and PowerCenter to support analytics, reporting, and downstream applications.
- Lead migration of complex on-premise Informatica PowerCenter workflows to Informatica Intelligent Data Management Cloud, ensuring data consistency, zero data loss, and improved system uptime.
- Build and optimize cloud data integrations between heterogeneous sources (flat files, relational databases, REST/SOAP APIs, JSON, XML) and Azure-based data lakes / warehouses.
- Improve ETL performance by implementing advanced partitioning, pushdown optimization, caching, and SQL tuning, reducing critical pipeline runtimes by 30% and enhancing data availability.
- Collaborate with business analysts, data architects, and product teams to translate business requirements into scalable data models, mapping specifications, and reusable integration components.

Prodg Technologies

November 2022 – May 2023

Informatica Developer

Hyderabad, Telangana

- Developed ETL data integration workflows using Informatica Cloud Data Integration and Cloud Application Integration (IICS/IDMC) for both batch and real-time processing
- Configured Service Connectors, web service transformations, and REST/SOAP APIs to integrate cloud and on-premise applications with enterprise data platforms.
- Wrote and optimized SQL queries for data extraction, transformation, and validation across Oracle, SQL Server, and MySQL systems, reducing job latency and improving throughput.
- Documented data integration processes, mapping specifications, and workflow configurations to support deployments, audits, and ongoing maintenance.

Achievements and Certification

- Rising Star Award: Recognized for exceptional contributions in Data integration projects.
- Informatica Data Engineering Foundation Certificate.
- SQL Programming Essentials- Udemy.
- Cloud Data Integration Services R41- Informatica.

Technical Skills

Programming & Frameworks: Python, PySpark

Databases: Oracle, SQL Server, Snowflake, MySQL

big Data Cloud Technologies: AWS, Microsoft Azure, Databricks

ETL Orchestration: Informatica IDMC/IICS (CDI,CAI), PowerCenter, Apache Airflow

Concepts: Shell scripting, REST/SOAP web services, Service Connectors, JSON, XML, flat files.

Projects

Customers Data Integration & Analytics Platform | PySpark, MySQL, REST API, JSON, ETL, CDC, Postman

- Designed and developed an end-to-end data engineering pipeline using PySpark to ingest, cleanse, deduplicate, and transform customer, product, inventory, and order data from APIs, CSV/JSON files, and streaming event sources.
- Implemented robust Data Quality checks, SCD Type-2 dimensions for Customer and Product masters, and enrichment logic, loading curated datasets into MySQL fact and dimension tables for analytics and reporting.
- Built a scalable architecture with mock REST APIs, batch and streaming ingestion flows, metadata logging and upsert mechanisms to ensure reliable, high-quality, production-ready data processing.

Education

Kakatiya Institute Of Technology And Science

August 2018 - May 2022

Bachelor of Technology in Mechanical Engineering (GPA: 8.42 / 10.00)

Warangal, Telangana

SR Junior College for Boys

June 2016 - March 2018

Intermediate in MPC (Marks: 975 / 1000)

Hanamkonda, Telangana
